

# Draft of the program

## Day 1 – Introduction to Critical Thinking

Content: A brief overview of the history of critical thinking, from classical rhetoric to the contemporary era, with a special focus on its role in the digital age.

Activities: Small group discussions on applying critical thinking to today's social context; critical analysis of real cases of fake news and disinformation.

## Day 2 – Developing Critical Thinking in Lifelong Learning Contexts

Content: Definition of critical thinking and its distinction from creative and logical thinking; tools and strategies to cultivate critical thinking; critical thinking as self-care and care for the world.

Activities: Workshop on current education policies and contemporary socio-economic issues with creative solution-building; group discussions on the role of universities and youth organizations in promoting critical thinking in education and daily life.

## Day 3 – Practical Applications and Emerging Technologies

Content: In-depth focus on using critical thinking in real-world situations, especially in relation to artificial intelligence.

Activities: Labs on responsible AI use, media literacy, and decision-making; sharing outcomes from subgroup discussions.
