**Short description of the course:**

Online Spanish | FL course, beginners' levels

The virtual courses of Spanish as a foreign language propose autonomous learning in which the student learns through the work plans offered on the UJI's virtual platform; activities for practice in the virtual environment; and a few hours of live video chat and tutoring through Meet, with the group and teacher, where work is carried out based on activities proposed live.

In the online courses, a series of activities are proposed to extend and facilitate student learning, and some compulsory language tasks are designed to consolidate learning and allow for monitoring and assessment.

The work plan is the road map containing compulsory activities, assessment tasks, deadlines, and the overall aspects necessary to follow the course.

Assessment is continuous, based on the monitoring of the tasks or projects at the end of the module or unit and the final test. The assessment takes into account the course assessment (and therefore the monitoring of the tasks proposed by the teaching staff) plus the final mark of the test.
